

# HANNALENE

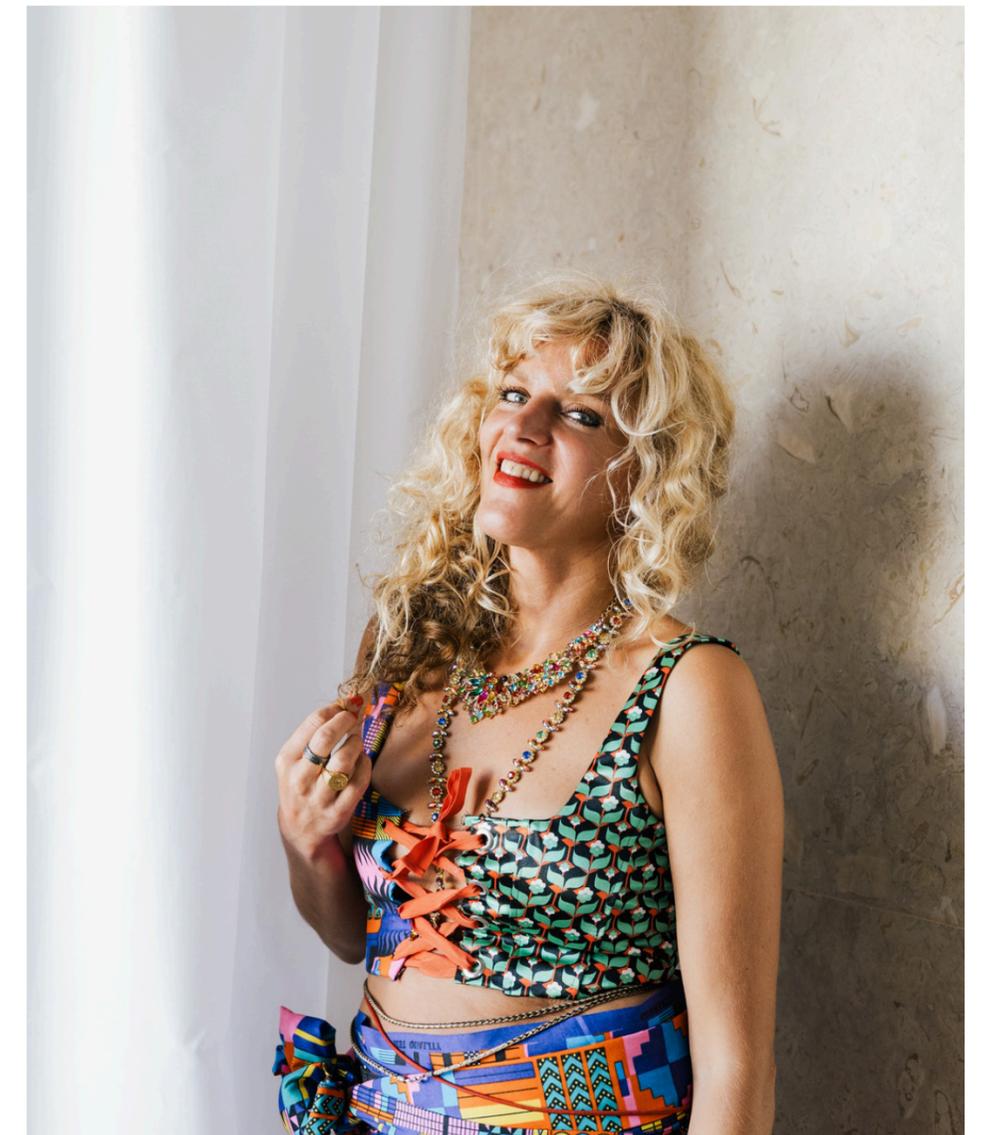

Born and raised in Berlin, Hannalene is a genre-defying singer, songwriter, and sonic facilitator whose music moves between soul, world, reggae, and sonic alchemy. Rooted in the belief that music is medicine, her work blends emotional depth with rhythmic energy — creating experiences that are both grounding and uplifting.

Her artistic path is shaped by early influences from Latin rhythms, global collaborations, and years of exploring the healing potential of voice and sound.

Hannalene's voice carries both intimacy and power, opening spaces where audiences often describe feeling “uplifted, shifted, and deeply touched.”

Each performance is an invitation to shift frequencies, awaken inner strength, and reconnect with the beauty of diversity and human connection.

# GOLD

EP (2024–25)

GOLD is Hannalene's latest EP — unfolding across five intimate and expansive songs, GOLD traces a deeply personal arc of growth, healing, and self-remembrance from longing to release, from darkness into light.

It began in late 2024 with

- Where the Light Is (Dec 2024), followed by
- Berlin (Jan 2025),
- Gold (May 2025),
- Release (Aug 2025) and
- Sober (Sept 2025) each track reflecting a new layer of transformation and clarity.

---

At the heart of the project are Hannalene's soulful vocals and emotionally rich melodies, carried by groovy drums, warm basslines, and evocative guitars. The EP was created in collaboration with exceptional musicians from around the globe — including Angola, Nigeria, Brazil, and Portugal and blends African-inspired rhythms with a Berlin sensibility, resulting in music that feels both timeless and boundary-pushing.

# HANNALENE GOLD

With new material for her upcoming full-length album on the horizon, GOLD stands as both a culmination and a beginning — the first chapter in a larger body of work rooted in deep presence, joy, and soul.
